DETAILED ACTION

Applicants' amendment filed 1/17/2007 has been entered. All pending claims have been carefully reconsidered in view of the amendment.

Allowable Subject Matter

Claims 9-18, 20 are allowed.

The following is an examiner's statement of reasons for allowance:

Optoelectronic devices having integrated optical components are well known in the art. Typical prior art devices may comprise plurality of optical processing elements integrated into one planar light circuit substrate. Koh et al reference (US 6,801,679 B2) is perhaps the closest prior art device with respect to pending claims of the present application. Koh reference discloses a planar light circuit device having optical waveguide layer and plurality of optical processing devices integrated onto a single substrate. Optical processing devices of Koh may include optical filters, multiplexers, demultiplexers, etc (see column 5 lines 12-51).

However, none of the prior art fairly teaches a apparatus comprising, inter alia, a multiplexer, demultiplexer, optical filter, MEMs system, and optical amplifier *all formed within* at least one optical layers *integrated within a multiplayer printed circuit board*, wherein the *multiplayer printed circuit board* comprises at least two of the plurality of electrically insulating layers separated by at least one of the plurality of optical layers, in the manner claimed in the instant application.

Art Unit: 2874

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
